FEEDING YOUR GREYHOUND: GUIDE TO A HEALTHY DIET

Providing your greyhound with a nutritious and balanced diet is essential for their health and wellbeing. Here are some tips to help you keep your greyhound happy, healthy, and full of energy.

Daily feeding recommendations

For an average-sized greyhound, it's best to feed them two meals a day, consisting of 1 ½ to 2 cups of high-quality dry food. Adjust the portion size as needed to maintain your dog's ideal weight and body condition.

Adding variety to their meals

To keep mealtime interesting, you can supplement their diet with a variety of fresh, wholesome foods. Consider adding:

- Lean fresh meat (250–300g per meal, morning, and evening)
- Tinned sardines (a great source of omega-3 fatty acids)
- Cooked vegetables (such as carrots, pumpkin, or green beans)
- Cooked pasta or rice
- Eggs (a good source of protein).

While variety can be beneficial, it's important to introduce new foods gradually and avoid making frequent changes to their diet, as greyhounds can have sensitive stomachs.

Feeding a dry-food-only diet

If you prefer to feed your greyhound only dry food, ensure you choose a product labelled as 'complete.' This ensures your dog receives all the essential nutrients they need for a balanced and healthy diet.
